

# PROBLEMS IN PROGRAMMING

scientific journal

*№ 1*

*January – March*

*2018*

Founded in March, 1999

## CONTENTS

### *Theory and methodology of programming*

Nikitchenko M.S., Shkilniak O.S., Shkilniak S.S. Algebras of general non-deterministic predicates 5

Nikitchenko M.S., Shyshatska E.V. Semantic properties of five-valued logics 22

### *Models and facilities for parallel and distributed programs*

Achour I.Z., Doroshenko A.Yu. Algorithm for automatic loop parallelization for graphics processing units 36

### *Software environment and tools*

Doroshenko A.Yu., Novak O.S., Ivanenko P.A., Starushyk A.M. Autotuning of parallel programs using the IBM Watsons Analytics data analysis system 46

### *Methods and facilities of software engineering*

Sydorov N.A., Sydorova N.N., Mendzebrovsky I.B. Software engineering ontologies categorization 55

### *Formal methods for software development*

Slabospitskaya O.A. Unified process for adaptive Semantic Web service composition 65

### *Models and facilities for data and knowledge bases*

Zakharova O. The technique of using Description Logics in the process of constructing a composite service at the functional level 77

### *Expert and intelligent information systems*

Ilina E.P. The expert analytic process for the choice of the organization management actions using corporative knowledge. Part II. Methods and Models of the Expert Methodology 92

***Critical systems software***

*Sokolenko A.S., Doroshenko A.Yu.* GPS coordinates processing with kalman filtration **105**

***Mathematical modeling of objects and processes***

*Yalovets A.L.* Statement of problem of unknown environment recognizing, navigating and path planning by agent **113**

***Methods, models and standards for creating structured electronic documents***

*Sharypanov A., Shchetynin I., Ivanov S.* Analysis of formal models and standards for structured electronic document in corporate informational system **128**

***Scientific information***

*First Announcement* **157**
